

LIKITHA SREE YARABARLA

AI/ML | Data Analytics | Business Intelligence

Ohio, USA | (234) 282-9548 | likithasree8999@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI/ML, Business Intelligence, and Data Analytics professional with 4+ years of experience delivering end-to-end analytics solutions across climate/ESG, public services, healthcare, and research. Experienced in cloud data engineering, executive BI, machine learning, NLP/GenAI, agentic AI prototyping, and analytics product development. Proven impact includes \$38K in annual cost savings, 480 hours of manual work eliminated, 40% faster reporting, 35% higher data quality, and large-scale modeling on 70M+ observations.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, scikit-learn), SQL, R, Regex | **AI / ML:** Generative AI, NLP, agentic AI, text clustering, sentiment analysis, anomaly detection, forecasting, classification/regression, feature engineering, model validation

Data Engineering: Snowflake, dbt, Apache Airflow, Redshift, AWS S3/Glue/Lambda/Kinesis/EC2, Azure, GCP, ETL/ELT | **BI & Apps:** Power BI, Tableau, Streamlit, Plotly, Looker, Qlik, executive dashboards, report automation

Data Architecture: Dimensional modeling, star/snowflake schemas, SCD, data marts, data quality/governance | **Business Analysis:** KPI design, BRD/FRD, requirements gathering, user stories, process mapping, gap analysis, cost-benefit analysis, stakeholder management

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst - Climate & ESG | Worldview Development USA, Inc. | Remote | Jul 2025 - Present

- Design and maintain executive dashboards, KPI frameworks, and reporting systems across climate, restoration, fundraising, and development programs, supporting C-suite and board-level decisions.
- Transform unstructured field observations, financial records, grant information, and partner inputs into structured analytics and decision-ready reporting; translate stakeholder requirements into technical specifications.
- Develop climate/ESG analytics and open-source MRV workflows using Python, Snowflake/dbt, Streamlit/Plotly, and satellite/environmental data for mangrove restoration, blue-carbon analysis, emissions/impact metrics, and portfolio risk visibility.

Data Analyst | 211 LA (County of Los Angeles) | Remote | Mar 2025 - Jun 2025

- Engineered automated SQL-to-Redshift pipelines using Apache Airflow, eliminating 480 hours of manual processing annually and generating \$38K in operational cost savings.
- Integrated datasets from FEMA, Airbnb, Salvation Army, and CareSuite; improved overall data quality 35% and reduced duplicate records 25% through advanced ETL and data-quality controls.
- Implemented GenAI-powered text clustering and survey summarization workflows that reduced analytical reporting time 40%; partnered with a 9-member ML research team on statistical validation and pipeline optimization.

Research Assistant - Data Analytics | Kent State University | Kent, OH | Sep 2023 - Dec 2024

- Built classification and regression models with scikit-learn on 70M+ behavioral observations; improved model recall 30% through hyperparameter optimization and k-fold cross-validation.
- Applied TF-IDF, embeddings, and NLP methods to survey/open-response datasets; built reproducible Python/AWS Glue/Snowflake pipelines and Redshift dimensional models for longitudinal research.

Analytics Engineer | Tesla Diagnostics Center | Hyderabad, India | May 2021 - Aug 2023

- Implemented machine-learning anomaly detection across 1.8 TB of patient vital-sign data, preventing 470+ critical device escalations across 14 clinics.
- Architected real-time ELT pipelines with AWS Lambda, Glue, and Redshift, reducing ingestion latency 60%; supported A/B testing across 85,000+ EHR records and HIPAA-compliant data governance.

SELECTED PROJECTS & CURRENT WORK

- Mangrove Monitor - Blue Carbon Market & Restoration Intelligence** | Python, Snowflake, dbt, Streamlit, Plotly
- Built a public-facing analytics application combining mangrove/restoration, climate, and carbon-market data to support portfolio monitoring, data storytelling, and environmental decision-making.
 - Created reproducible data transformation and visualization workflows and published analytical insight on blue-carbon market activity and restoration outcomes.
- ReliefOps Agent - All Things Agentic Hackathon** | Google ADK, Gemini, Python | In development
- Building an agentic emergency-shelter operations assistant that evaluates shelter capacity, water, meals, and vacancy data, flags critical shortages, and supports fast operational triage.
- LCA Data Quality & Dataset Validation - Climate Analytics Support** | ILCD, UK GHG Factors, openLCA, Environmental Footprint
- Evaluated life-cycle assessment data sources, dataset quality, and reporting inputs using recognized LCA guidance and environmental databases to support defensible climate-analysis workflows.
- Blue Carbon Research & Data Storytelling** | Climate data, carbon markets, technical writing
- Published analytical work translating mangrove-restoration and carbon-market datasets into accessible findings for non-technical audiences and decision-makers.
- Grant Budget Monitoring & Compliance System** | Python, SQL
- Managed end-to-end financial data oversight for \$2M+ in government/foundation grants and automated monthly budget-vs-actual variance reporting for transparency and compliance.
- Healthcare Data Engineering & Analytics Platform** | Snowflake, Python, SQL
- Designed ETL and data-quality frameworks integrating healthcare/insurance datasets from 15+ heterogeneous sources with governance controls for regulated analytics.
- Unclaimed Property Data Platform** | Snowflake, Python, SQL
- Consolidated unclaimed-property reporting data from all 50 U.S. states into standardized analytical schemas and reusable transformation pipelines.

EDUCATION

- Master of Science in Business Analytics** | Kent State University, Kent, OH | GPA 3.75/4.0 | Dec 2024
- Bachelor of Technology in Electronics & Communication Engineering** | Malla Reddy University, Hyderabad, India | GPA 3.54/4.0

CREDENTIALS & PROFESSIONAL DEVELOPMENT

- Tableau Desktop Specialist | Advanced SQL for Data Analysis | Python for Data Science & Machine Learning
- Anthropic Academy: Claude 101 and Claude Code 101 | AWS Solutions Architect coursework in progress
- Climatebase Fellowship, Cohort 10 | All Things Agentic Hackathon participant | AWS Trainium Frontier competition registrant
- Agile/Scrum, JIRA, Confluence, Git
